Multidisciplinary approach

Questions + Problems
Dr. Ing. Peter Wagner
Multidisciplinary approach

The protection of lives and health of the people and the minimization of the damage of fires, accidents and other emergency cases has utmost priority.

What is important to our work?

Are we ready to learn of each other and together?

This presentation has been produced with the financial assistance of the European Community

Dr. P. Wagner 2005
1. What is Multidisciplinary approach?
2. Situation of the fire brigades in the world
3. Situation of the fire brigade in Turkey
4. Tasks of the Services?
5. Multidisciplinary approach – is this a kind of cooperation?
6. How work together?
7. Multidisciplinary approach – what is practice?
8. Emergency tactic
9. Emergency management
10. What can we do better?
11. Conclusion – what we learned today?
What is Multidisciplinary approach?

- Fire brigade activities in different areas, as
  - fire-fighting,
  - technical assistance,
  - medical rescue and
  - environment,
- Cooperation with other services
- Inter-disciplinary work is the base for the solution of emergency tasks

What is important to our work?

Cooperation and learning of each other – it’s without alternative!
Daily work of Fire Brigades

**What is important to our work?**

World-wide, annually approximately 250 fire-fighters die in fires. There are 3,16 deaths by 10.000 fire-fighters or 1,6 deaths by 10.000.000 inhabitants.
Number of calls by major type of call by the countries of the world (2000-2004)

- Medical aid: 61%
- False calls: 10%
- Other calls: 10%
- Fires: 9%
- Incidents: 4%
- Technical aid: 6%

What is important to our work? In each 10 percent of the calls there are fires and technical assistance.

This presentation has been produced with the financial assistance of the European Community  

Dr. P. Wagner 2005
What is important to our work?

In each case 35 percent of the fires, it breaks out in buildings and in freelands.
Distribution of fire deaths by fire origin in the countries of the world (2000-2004)

What is important to our work?

80 percent of all fire deaths connected with dwelling fires.

### What is important to our work?

Main fire causes are tobacco and electricity; every 5th fire is unknown by cause.
Main task of the fire brigade is fire-fighting; but: the share of technical assistance grows!

What is important to our work?
What is important for our work? Majority of fires: in buildings and with vehicles

This presentation has been produced with the financial assistance of the European Community  

Dr. P. Wagner 2005
Causes of fires in Körfez (Province of Kocaeli, 2004)

What is important to our work? Fire cause number 1: wrong activities of the people

This presentation has been produced with the financial assistance of the European Community

Dr. P. Wagner 2005
Fire Risks in Turkey

What is important to our work?

This presentation has been produced with the financial assistance of the European Community  

Dr. P. Wagner 2005
Disaster Responce and Multidisciplinary approach

- Disaster Responce Plan
  - Disaster by national and international definitions:
  - Examples: Earthquake, flood, forest fires and other high number of victims, high damage, national effects

- Multidisciplinary approach
  - Every day work
  - Serving Emergency Calls

- Fire Brigades
- Medical Rescue
- Police
- Civilian protection
- Other private or volunteer organisations

What is important to our work?

In each country, there are different definitions of Disaster but what doesn't work in the daily work, either won't work during Disaster!
Multidisciplinary approach –
tasks of the services

- Fire brigades: fire fighting, rescue, emergency operations, hazmat and others;
- Medical rescue service: rescuing, treating, persons transportation, taking care of,
- Police: securing of emergency places, special internal police tasks.

What is important to our work?

Every support and rescue service have general and specific tasks. At the call scene, a cooperation is necessary!
The situation of the fire brigades
an international overview

- Fire brigades work interdisciplinary:
  - fires,
  - accidents,
  - danger materials,
  - rescue service,
- To be a firefighter is a dangerous profession,
- Fire brigades require an interdisciplinary education,
- Fire brigades work together with all other services.

What is important to our work?

Fire brigades are world-wide the most strongest part of the emergency and rescue services!
**Multidisciplinary approach. cooperation with other units of the administration**

<table>

<td><strong>Water supply</strong></td>
<td>Other services</td>
</tr>
</tbody>
</table>

**What is important to our work?**

Fire brigades require the support of all other services!

---

This presentation has been produced with the financial assistance of the European Community

**Dr. P. Wagner 2005**
Multidisciplinary approach - terms of cooperation

- Responsibility for a concrete purview on the basis of laws;
- Competence of the rescue services in their own tasks;
- Responsibility, for victims, concerned and own members of service;
- Utilization of all organizational and technical possibilities, to help fast and expertly.
Multidisciplinary approach
as we work together as helpers and rescuer?

- Concrete and logical work division
- The right sequence of the work steps
- Control:
  - credits we all done,
  - about the victims and concerned all the imaginable help, to give come-leave?

What is important to our work?

Not the performance of the individual organization stands in the foreground of the activities. In the center, the total result stands: low victim numbers and minimal damage.
Command and Control – emergency tactics

- Police: the street must be evacuated as fast as possible?
- Rescue service: the injured persons must be brought as fast as possible into the hospital?
- Fire brigade: the fire danger must be spellbound and is freed fast the people from the vehicle?
Command and Control - Emergency management

Germany:
- Group leader: **Fire Brigade**
- Consultants:
  - Rescue service
  - Police
  - Other services

Turkey:
- Group leader: **Everyone?**
  - All have own tasks
  - Everyone has an individual group leader
  - All work parallel
<table>
<thead>
<tr>
<th>Fire Brigade in the own city</th>
<th>Activities of the Fire Brigade in the neighboring city or community</th>
</tr>
</thead>
<tbody>
<tr>
<td>● Fire Brigade has the head of management</td>
<td>● Fire Brigade subordinates the group leader of the neighboring community</td>
</tr>
<tr>
<td>● Cooperation of all other services and leadership of the Fire Brigade</td>
<td>● Cooperation of all other services and leadership of the local Fire Brigade</td>
</tr>
</tbody>
</table>

Decision
Multidisciplinary approach - what can we improve?

- Work out a conception of a common emergency tactic
- Study of the technical appliances and equipments of the other services
- Meetings of Personnel from different services
- Common education
Multidisciplinary approach - common education?

- Fire brigade with Emergency service
- Emergency services with the fire brigade
- Police with fire brigade and Emergency services

What is important to our work?

Whoever is obliged to the cooperation must be ready to learn from his partners!

This presentation has been produced with the financial assistance of the European Community  
Dr. P. Wagner 2005
Multidisciplinary approach - what we learned today?

- Mechanization of the environment: buildings, means of transportation, appliances and much more
- All rescue services must learn to handle the mechanization. Therefore, it must be learned every day!
- The cooperation of the services necessarily is necessary!
- The cooperation necessitates work division, specialization and coordination!
- All must prepare: plans together and practices!

What is important to our work?

Whoever wants to the cooperation must be ready to learn from his partners!
Multidisciplinary approach – what are the nexts steps in Turkey?

- Implementation of Central National Fire School inside the Ministry of Interior
  - Central National Fire School train **trainer** for local Fire Brigades,
  - Central National Fire School educate and train **all** Fire Officers (Fire Engineers),
  - Central National Fire School educate and train **all** Fire Chiefs.
- Implementation of First Medical Aid education and training in every Fire Station for First Responder systems.
- Strategically planning in Fire Brigade include assessment of all real risks within the response area of the service. For this Fire Brigades should use new technical and scientific methods.
- Upgrading of Fire Brigades Law (types of Fire Brigades, Command and control regulation, cooperation with other services)

What is important to our work?

Success = cooperation + education + training

This presentation has been produced with the financial assistance of the European Community  

Dr. P. Wagner 2005
Thanks for the attention!

What is important to our work?

Changes are always difficult; important to do the first step!
